

Assignment 9

Excel Function Usage Documentation

Function	Used to	Reference
Aggregate Functions		
1. SUM	Used to calculate SUM of income, expenses, savings	Sheet: Summary Cells: E9, E10, E11
2. AVERAGE	Used to calculate average expense per category	Sheet: Summary Cell: B42
3. COUNT	Used to count categories with data	Sheet: Summary Cell: B40
4. SUMIF	Used to sum values of income and expense for each month and each category -Sum of Expense/Income for the selected date in P7	Sheet: Summary Cell: B15:B19 Cell: B23:B39 Sheet: All Months Cell: D8:E10 Cell: J15:N19 Cell: Q16:Q31 Cell: Q9:R9
5. AVERAGEIF	Used to average expense for each category	Sheet: All Months Cell: R16:R31
6. COUNTIF	Used to calculate count of each category	Sheet: All Months Cell: S16:S31
7. SUMIFS	Used to Sum of expenses based on multiple conditions.	Sheet: All Months Cell: D44:D46
8. AVERAGEIFS	Used to calculate average expenses based on multiple conditions.	Sheet: All Months Cell: E44:E46
9. COUNTIFS	Used to calculate count of expense category based on multiple conditions.	Sheet: All Months Cell: F44:F46
10. MIN	Finds the minimum expense in a range	Sheet: Summary Cell: L8
11. MAX	Finds the maximum expense in a range	Sheet: Summary Cell: L14
Conditionals		
12. IF	Used to add a piece of text ("Income from/Expense on") to tell either it is expense or income	Sheet: All Months Cell: Q6:R6
13. IFS	Made categories of savings, e.g, high savings, medium, low or no savings based on multiple conditions	Sheet: Summary Cell: P11:Q11

14. VLOOKUP	Fetch the amount on a particular a date	Sheet: Summary Cell: T27
15. XLOOKUP	-Used to calculate the total expense per category over the period -used to fetch the min/max expense category name.	Sheet: Summary Cell: C22:J46
16. INDEX	To get the date when income received	Sheet: Summary Cell: T26
17. MATCH	Used within INDEX function to automatically catch the row & col number,	Sheet: Summary Cell: T26
Filter Functions		
18. FILTER	-Filtered out all the data respective of its month into different sheets, giving the month names as condition. -Filter the categories based on condition of either it's income category or expense category	Sheet: All Months Cell: B14 Cell: I15:I19 Cell: P16:P31 Sheet: Summary Cell: A15:A19 Cell: A23:A39
19. UNIQUE	Used to get the unique values of categories	Sheet: All Cell: same as above
20. TRIM	Used to remove extra spaces if present in description	Sheet: All Months Cell: Q7:R8
Conditional Formatting		
21. Sparklines	For quick glance withing cell, to see the trend etc.	Sheet: Summary Lines: Cell: F9:F1 Bars: Sheet: Summary Cell: B15:B39 Sheet: All Months Cell: J15:N19 Cell: Q16:Q31
22. Data Highlight	-Used to highlight row to see a particular activity on a specific date selected in P7 fromthe calendar	Sheet: All Months Cell: B14:G41
23. Calendar	Used to make the date values invisible out of the selected month	Sheet: All Months Cell: H5:N10
24. Text Highlight	Given different colors to text for different saving ranges	Sheet: Summary Cell: P11:Q11

Data Validation		
25. List Selection	Made easy to select type and categories from list' also used Indirect function to automatically update category list based on type.	Sheet: Summary Cell: T24:T25
Text Functions		
26. CONCATENATE	Used to Join texts for Stylish look	Sheet: All Months Cell: C3:E3
27. TEXTJOIN	Used Textjoin function to list down all categories in a single cell on a particular date	Sheet: All Months Cell: Q7:R8
28. IFERROR	Used to show "No Activity" If no activity happened on selected date	Sheet: All Months Cell: Q7:R8
Advanced Functions		
29. Macro	-Macro for new entry in raw data on clicking macro button -Macro for switching sheets with shortcut Cntl + Alt + E	Sheet: Summary Cell: G2:M2 Sheet: Raw Data Cell: H3
30. VBA Code	With the Help of ChatGPT wrote a VBA code make a calendar.	Sheet: All Months Cell: H5:N10

Calander Function:

Used SEQUENCE, DATEVALUE, WEEKDAY functions to make a calendar, using available date values, then made a connection with the P7 cell in such a way that that if you click on a date in calendar, the exact same date will appear in the P7 cell. Based on that selection, you can easily know on that date what expense incurred, on which things, or what income you received, from where, and what amount in total. Plus, the rows in the table will highlight for that date.
